

Freeze Property tax for 4 years across the board...1% cap...City must put it to a vote by residents during election if they need to increase more. The increase will be for one year only before retracting to where it should have been the following year

That would hopefully keep rent more stable rather see increase

No overtime taxes

No state income tax after 40 hours... with no cap for 12,000 dollars

No tax on tip of 12k max, after...tax...republican want it 24k

Lower Processing Fees/ convenience fees/

Max of 3 dollars or 1%(whichever is the lowest)

No late fees

Income tax from **9.85 to 5.28.....**

Sales tax: from 9.875% to 6.875%

Retired will not be taxed on SS....will like to explore idea of no taxes on property until home is sold or given to family member

See a drastic change in Tabs anywhere from \$50 dollars to \$225

Unless its used for work vehicle/d.o.t.

Distilled Spirits a 15.35% drop

Tobacco will maintain the price until we look at where things are and redirect it towards rural towns for updating infrastructure/ ada compliance or other things they desperately need before lowering tobacco tax

Tax Savings

2) Freeze increase property tax (Not eliminate)

1) Freeze increase property taxes for next 4 years 1% increase for inflation cap per year...must be voted if need to increase by citizens where it increases for one year but drop back down to where it should be prior to the increase the following year

1) To give relief

1) Home Owners /mortgages

2) Businesses

3) Rental Properties taxes

1) To maintain rental price for the next 4 years

Increase of tax why is rent keeps going up significantly? If we pause, will it slow down the increase of rent/ not stop/ but slow it down

(To give back the people/ the government already took and miss used the taxes and by freezing property tax, would allow to give back to citizens / to stop government taking more to recoup the loss over fraud.)

1.5) Lower Tax Property

1) If the Value of the house goes down/ tax must go down

3) Overtime after 40 hours taxes

1) No State income tax after 40 hours no cap

Servers cap at 12k

(if you work 10 hours of overtime every week for 52 week...3,200/year/ (that's 1.5 months' worth of daycare?)that's...one to two mortgages?///if you work 15 hours a week...that's 4,875 extra per year....I was working 35 hours of overtime...I could have made extra 218 dollars per week...11,375....could have made 126k rather 115k?

(If someone sacrifices time away from home, shouldn't be paying more taxes)

1) Tax bracket should be based on the first 40 hours per week

- a. That if you work overtime that sends you to the next bracket, that you will still be on the original bracket prior to the overtime pay.
- 2) 4) No tax on start-up / unregistered / side hustle Businesses (Lemonade Stand)
 - 1) If you make 10k dollars or under
 - 1) not including expenses
 - 1) top at 5k expense
- 3) (The whole point is to test the business idea to see if that's what you want to pursue)
- 5) State Corporate tax will be cut from 9.9 year 2024 to 8.8 in 2026...want it to drop to 3.9% effective immediately with a drop by .05% every year for 4 years to bring it down to 1.9% and hold steady...to be competitive and attract large business.

(we may lose money at first, but hope to draw large businesses over time that would bring more taxes and the big thing we are after is jobs...we are already behind)

2) Processing Fees

- 1) enough to cover any credit card fees

Max of 3 dollars or 1%(whichever is the lowest)

- 3) Utilities Bills for Homes and rental homes properties only

- 1) if you are not using certain Services shall not be charged

1) Example Composting

1.5) If neighbors decide to share Garbage Can, split the cost

7th highest in US for income tax...bring it

Bring it down from 9.85 to 5.28.....53.6% savings that's the average of ND(2.5), WI(7.65), IA (5.7) and SD (0%)

I would like to do where your tax bucket doesn't go up after 40hours

No overtime tax/ no cap

Sales tax: 6.875% from 9.875% ·drop 11% total to be more competitivetook the average of all 5 states and dropped it by percentage

Property tax: 1.02% average effective rate is fine....could be 1/10 of a percent lower...but its fine, not increasing for the next 4 years

Want to change Net to 4 or 5 million rather 1 million

Estate tax from 3 million to 10 million

Retired will not be taxed on SS....will like to explore idea of no taxes on property until home is sold or given to family member

See a drastic change in Tabs anywhere from \$50 dollars to \$225

Unless its used for work vehicle/d.o.t.

Distilled Spirits a 15.35% drop

Tobacco will maintain the price until we look at where things are and redirect it towards rural towns for updating infrastructure/ ada compliance or other things they desperately need before lowering tobacco tax

No tax on tips up to 12,500 for servers

Car tab

PROPOSED SIMPLE FAIR TABS SYSTEM

1. Flat Base Fee:

\$25 per year for all passenger vehicles.

2. Value-Based Add-On:

1% of vehicle value

Minimum: \$50

Maximum: \$225

3. Age Discount:

Vehicles 10+ years old: 40% off total

Vehicles 15+ years old: 60% off total

4. Electric Vehicles (EVs):

EVs pay a flat \$75 annual road-use fee in place of special surcharges.

Would like to consider nuclear powerplant, cleaner and cut the price in half for all electric bills and be able to support Electric cars

Distilled Spirits

Right now its \$8.74 per gallon can bring it down to 7.40 per gallon, a 15.35% drop in savings

If and only if it doesn't disrupt on allocating funds for schools and meals.

keep in mind, Iowa is almost twice as high as MN...when it comes to taxes of alcohol...Also it pays for 90% of the schools k-12 grade and other programs....we would have to cut health and human services (lots of fraud in this area) and local government aid (might be some fraud...unknown) but also We are now on the hook to feed all the kids 3 meals a day and weekends as well...Program Walz pass last year I believe....that's more money.

But let's say we cut spending in "health and human services" because of fraud...and we find other programs to cut if fraud is found or we don't like the program... I think if we are to cut taxes on alcohol...15.35% in tax cut would be the most for the time being if it doesn't disrupt the cost of school allocation including lunch for kids.

I would keep Tobacco tax right where it is at and specifically earmarked for the University of Minnesota's Academic Health Center and the Commissioner of Health for medical education

and research.....certain percentage would be redirected towards outward small towns that need it to bring town up to code like water treatments and other important infrastructure and even help with daycare if they need it... after all are neighbors in the rural area (small towns) are up updated... can bring down the tax to 45% tops! I wouldn't know how low until I see all the numbers on how much we have left over.....
